

## **RX240 Series (High-Speed Ring Spinning Frame)**

The RX240 Series delivers the high quality, high productivity, superior operability, and easy maintenance demanded of a spinning frame through such advanced Toyota technologies as proprietary spinning geometry, positive lifting, and a 10.5-inch color function panel. We also added a system to handle the full range of fancy yarns, the first spinning frame manufacturer in the world to do so. With simple, easy operation, fancy yarns can be spun in all patterns. In addition, the Toyota Monitoring System (TMS) that enables connection to the Internet, a space-saving, energy-efficient design at world-class levels, and minimal doffing times promise satisfaction and reassurance in every way.

### [ Main specifications ]

- Maximum spindle speed: 25'000 rpm
- Spindle gage: 70 mm, 75 mm
- Bobbin length (lift): 180 (155) mm, 210 (185) mm, 230 (205) mm, 250 (255) mm
- Spindle driving system: 4 spindles by spindle tape
- Pneumatic suction cleaning system: flute, single nozzle
